**More styles and options
than ever before.**

*Unlimited window style
combinations and interior
design flexibility*

*Excellent performance
in the toughest weather*

CertainTeed 

Open your home with beauty, convenience, and performance.

Awning windows used in combination with fixed windows bring ventilation and light to out-of-the-way spaces.

CertainTeed's latest generation of casement and awning windows incorporates all we've learned about vinyl windows since we pioneered them in 1979.

From our patented CertaWood™ composite vinyl window interior, to new advanced hardware, to a larger size offering, to new weather-tight engineering, these windows offer real innovations. And real advantages.

That makes these windows more versatile and a better choice than any other vinyl casements.

No other vinyl casement windows offer greater design flexibility. These windows are engineered for great looks. With slim profiles, color coordinated hardware, and a large glass area, they give you clean, continuous lines and an optimum viewing area.

They are also engineered for design flexibility. They have a beveled outside edge that makes them perfect counterparts for use with our other CertainTeed windows.

The design possibilities are vast. You can use casements or awnings alone. Create combinations. Add maximum ventilation to a

bay, bow, or window wall. And, with our patented composite vinyl windows with paintable and stainable wood-fiber interiors, you can coordinate the windows with any interior decor — for much less than the cost of wood.

Every detail makes life easier. Solid vinyl construction is virtually maintenance-free. No exterior scraping or painting — ever. And cleaning is simple. A special hinge arrangement lets casement windows open for easy cleaning from the inside.

Heavy-duty operating hardware has an E-Gard® coating, tested to be nearly

A special hinge allows CertainTeed casement windows to open a full 90 degrees for easy cleaning from the inside.

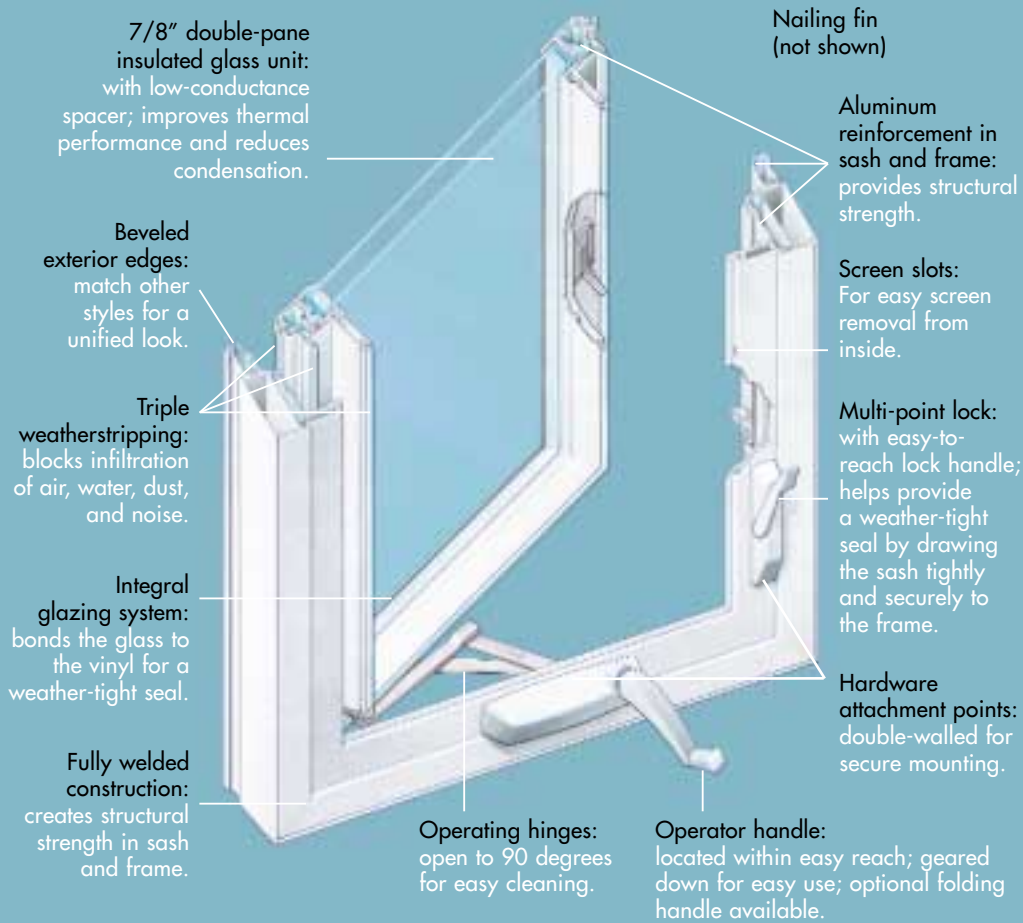

three times better than common zinc-plated hardware to provide added corrosion protection.

The windows are especially easy to operate, with a crank mechanism geared down to require very little effort. The crank handle is located within easy reach, at the bottom of the window.

CertainTeed's vinyl composite casement windows with patented CertaWood technology have a real wood-fiber interior for the authentic look of wood. And, they can be painted or stained any color for total design flexibility.

Casement window features and benefits

Note: CertainTeed's exclusive Thermafect® Low "E" glass is available as an option. In larger casements, a fixed operator arm attaches to keeper side of sash.

The multi-point lock offers extra security and easy operation — it reaches out to capture the sash, and makes sealing the window one smooth operation.

Excellent performance in the toughest weather.

As with all CertainTeed windows, these casements and awnings are engineered to beat the weather. In fact, they outperform industry standards for air and water infiltration by over 100 percent.

Fusion-welded construction and integral glazing mean that there are no gaps in frames or sashes. Triple weatherstripping encircles the window opening and the multi-point lock makes it a weather-tight seal.

With CertainTeed's proprietary Thermafect® Low "E" glazing system with argon gas and low conductance spacer, these windows deliver the best U-value in their class. What's more, Thermafect significantly

outperforms ordinary glazing systems in UV block, shading coefficient, and solar heat gain coefficient.

The strongest warranty in the industry. CertainTeed windows are covered by a lifetime limited warranty, plus our SureStart™ protection that covers 100 percent of the cost of materials *and* labor for any manufacturing defect which occurs during the first five years following installation.

Hardware style and color options.

White and tan vinyl casement windows have color-matched hardware. Fixed handle style, shown below, is standard.

CertainTeed's vinyl composite casement windows have clay-colored hardware standard; brass and white hardware are available as options.

White on white vinyl

Tan on tan vinyl

Clay on vinyl composite

Brass on vinyl composite

Folding handle

Handles are also available in a folding style (shown below in white) to minimize interference with draperies and blinds. They are available in the color choices shown above.

Window options

Grids

Grids between the glass, Certalite™ grids, and Certalite grids with stainable, paintable interior and white vinyl exterior are available.

Nailing fin

Available for new construction applications.

Accessories

Snap-in 1/2" and 3/4" J-channels, snap-in 1/2" drywall return and snap-in 3/4" wood return are available.

Glazing

7/8" double-pane insulated unit with low-conductance spacer; available with Thermaflect® Low "E" glass and argon gas; or clear, tinted, obscure, or tempered glass also available.

Colors

Vinyl windows available in white or natural tan; composite vinyl windows with paintable, stainable interior and white vinyl exterior also available.

Screens

Fiber glass mesh screens with color-coordinated aluminum frames and easy-to-use pin installation available.

Hardware

Fixed handle or optional folding handle. Available in white, tan, clay, and brass.

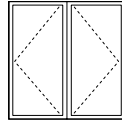

Mullions

Windows can be joined with CertainTeed's structural mullion system, which allows window combinations to meet challenging grade requirements; heavy duty aluminum core meets most normal requirements; galvanized steel strips can be added to meet higher grades.

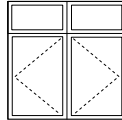

Create combinations for virtually any look. CertainTeed casement and awning windows are available in a wide range of standard sizes and configurations for new construction applications, and custom-sized for exact replacement applications. Their design details complement CertainTeed's New Haven™ composite vinyl windows and New Castle XT™ vinyl windows for new construction, and Haverford™ composite vinyl

windows and Bryn Mawr II™ vinyl windows for replacement.

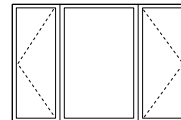

For use in combinations, including bays and bows, CertainTeed has designed a fixed casement that is complementary to the operable casement windows, creating a highly attractive unit. Joined by CertainTeed's structural mullion system, such combinations are designed to meet the most challenging performance requirements.
